

# GROTE STREET MIXED USE DEVELOPMENT

Adelaide,  
South Australia

JPE were invited to take part in this design competition for a new mixed use development in the centre of Adelaide.

The elegant and highly articulated design response offered by JPE drew inspiration from the grid and park nature of Adelaide's city plan, and would set a new benchmark in sustainable mixed-use building design, while redefining Grote Street's local identity within the context of the Central Market Precinct and the city as a whole.
