

JPE DESIGN STUDIO

Adelaide,
South Australia

Perhaps the hardest place to design is your own 'place'. JPE have recently relocated into the 'Wave' and into our own studio space.

We engaged all of our people in the search for a meaningful place for us and our clients. We have created contemporary and flexible spaces as a canvas for creative work and ideas.

We have places for quiet contemplation, gallery spaces, team work areas and many interactive creative spaces for teasing out the best ideas with clients

This project received a RAIA Architecture Award for Interior Architecture in 2011.
