

# MASONIC HOMES MASTERPLAN

Somerton Park,  
South Australia

JPE in association with Blair Architects and including collaborative input from WAX Design, have developed an Urban Design Master Plan for Masonic Homes Somerton Park. Stage one of the project included the review of existing building fabric, the establishment of issues and criteria for the future development of the site and an overall design framework for this to occur.

The second stage of this project involved innovative exploration into the redevelopment of existing buildings and the development of new independent living units and apartments, as well as detailed open space planning, to provide clear access, parks and community gardens.

Overall, the Masterplan aims to deliver design outcomes that will enhance the experience and lifestyle of the site's residents and maintain Masonic Homes' position as a leading provider of aged care accommodation well into the future.
